

Ravadinovo Castle is a unique attraction for Bulgaria. It is located left on the road, before village of Ravadinovo when comming from Sozopol. This is not an authentic historical building (even it is still in process of completion), but it was built with understanding and with attention to the all small details, so it looks like a real medieval knight castle.

It is built of stones and the total area of the site is around 30 000 sq.m. There are many gardens and green areas and the building is overgrown with ivy. Front of the castle is situated an artificial lake. The castle hosts an art gallery, wine cellar and several large halls. The building has very beautiful night lighting, which makes the place fabulous.
