

It is 21 km north of Devin. The mineral spring whose water is naturally aerated is at a distance of 2 km from the village. It is used (by drinking) for the treatment of chronic diseases of the gums, abdominal ulcers, chronic gastritis, cardio-vascular diseases, etc. The Mihalkovo bottled mineral water is popular in the country. Holiday making facilities have been built in the region. Curious: The Mihalkovo mineral water is the most strongly aerated carbonic acid water in the country.
